Hi all,

This place have 70 kids from 8 months to 17 years old. They have 22 staffs (10 sisters and 12 hired helpers). It has been working in 12 years.

69 kids have problem with the brain, some are able to do things, some are just laying all the time, some are hurting themselves by hitting to the wall or falling down...

After visiting them, we have to thank God that we are luckier than them to have healthy body and admire the people who are working there with them day by day, hour by hour, minute by minute for their whole lives.
